Preventing the Elements of Nature from the Lock

The GrimeStopper can be used with mortise cylinders, rim cylinders, cam locks, switch Locks etc. GrimeStopper stands up in the harshest cold weather, protects against extreme moisture, and seals out dirt or any foreign matter in the most rugged environments. Vandal resistant, wrench resistant and protects lock/key cylinders. Protection + pleasant aesthetics. Has our patented lift up spring loaded door, lift the cover, turn the key and open the lock with one hand then with a flip of a finger the cover snaps closed.
